Integrating optical networks and fixed wireless technology, Brown Dog Networks provides solid soutions for Business and Residential services. Brown Dog Networks has solutions in all major population areas around St. Louis providing Ethernet Services in our portfolio of Brown Dog lit buildings, as well as Fixed Wireless, and traditional wireline services . Additionally we have a focus on lower density rural/fringe areas in an effort to provide connectivity in those areas where it was previously not available.

Internet Evolved

Adaptation of technology to maintain a leading edge in connectivity, Brown Dog Networks continues to evolve with the changes while maintaining our focus of staying on top of our customers demands.
